

LANGLEY HOSPITAL

Obstetrics/Gynecology - Full time position

We are looking for a generalist OBGYN interested in working in a community hospital with 3-5 home call shifts per month. We are a close group of physicians and would prefer someone who excels at working as part of a team. OR access is based on wait times but on average is 1-2 days per month plus additional caesarian-section time. We do advanced minimally invasive surgery and often assist each other with challenging cases.

Our group of seven obstetricians and gynecologists provide primary maternity care and work closely with excellent family practice groups and multiple midwifery groups. There is an opportunity to share existing office space as all of us practice currently out of the same office. We look forward to working with the successful candidate to deliver both maternity care and gynecology services with which our patients, staff and physicians can share a sense of pride.

Langley Hospital is a community hospital with a nursery (>35 wk gestational age). ER, Anesthesia, pediatrics and obstetrics deliver 24/7 call services. Our hospital provides an exceptional team that works well together in a collegial community setting.

Please forward letter of interest, CV and three reference letters or referee contact names to medicalstaffrecruitment@fraserhealth.ca by no later than March 23, 2023. Anticipated start by no later than June 1, 2023 or as soon as interviews are conducted.
