

Obstetrician & Gynecologist

Abbotsford Regional Hospital & Cancer Centre

Full-time position

We are seeking a seventh colleague as a replacement in our Abbotsford Ob/Gyn group. We are a collegial group who work closely with an excellent family practice group and multiple midwifery groups. We are able to practice to the full scope of our specialty; our nursery cares for babies 32 weeks and up. There are 2,600 births /year for which we are involved in both a primary care and a consultative role.

We are supported by a local Diabetes in Pregnancy Education Program and the Surrey MFM group. We have regular surgical days, and additional outpatient ambulatory procedure time is available. Our equipment is up-to-date and includes what is needed for advanced minimally invasive laparoscopic and hysteroscopic procedures. Our operating rooms have recently gone through an upgrade of imaging equipment. There is excellent surgical support from allied services including vascular and urology.

Our hospital is a sought after site for family practice residents, and we work closely with them on call and in our offices. On call expectations are reasonable (1:7). We have an urgent need in our community and look forward to working with the successful candidate. There are opportunities to share existing office space within the community.

Anticipated start date is flexible from March to July 2023.

Facility: Abbotsford Regional Hospital and Cancer Centre

Abbotsford Regional Hospital and Cancer Centre is a 302 bed, University of British Columbia affiliated hospital offering medical, surgical, obstetrics, inpatient pediatrics, renal, cardiology, tertiary palliative care, helipad, as well as 24/7 emergency services with 77,032 visits annually.

Emergency Department Renovation and Redesign Project

The hospital recently underwent a renovation and redesign of its Emergency Department that now includes a dedicated area for mental health and substance use care, a new nursing substation, and a relocated ambulance bay, among other features, to help improve patient flow and experience.
